PROFESSIONAL SUMMARY

Backend developer with 8 months of professional experience building Node.js/Express.js REST APIs, JWT/RBAC authentication, and MongoDB aggregation pipelines, plus Razorpay, Shiprocket, Socket.IO, and Agora integrations. Shipped two live full-stack products in 2026 (mssst.in, lofiradio.in) using TypeScript and Next.js. Based in Bengaluru and available to join immediately as a Backend Developer, Node.js Developer, or Associate Software Engineer.

TECHNICAL SKILLS

- **Languages & Frontend:** JavaScript (ES6+), TypeScript, Java, React.js, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, REST API Design, JWT Authentication, Role-Based Access Control (RBAC), Socket.IO (WebSockets), Agora SDK, Redis(Caching), BullMQ (Background Jobs), Third-Party API Integration (Razorpay, Shiprocket), Bcrypt, Helmet, Rate Limiting
- **Databases:** MongoDB, Mongoose, Aggregation Pipelines, Schema Design, Supabase
- **Cloud & Tools:** Git, GitHub, Docker, Postman, AWS S3, Cloudinary, Vercel, Render, Netlify
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

WORK EXPERIENCE

Backend Developer (Node.js) **Sep 2025 – Apr 2026**
Wayone IT Solutions, Delhi

- Built and maintained Node.js/Express.js REST APIs across multiple client applications, designing MongoDB schemas and aggregation pipelines for data retrieval and business logic.
- Implemented JWT authentication, role-based access control (RBAC), and user management with API-level authorization across multiple backend services.
- Delivered an end-to-end order management workflow integrating Razorpay (payment verification) and Shiprocket (order creation, shipment tracking, delivery-status updates) through REST APIs.
- Developed backend modules for Hello Her, a real-time communication platform: Socket.IO for chat, notifications, and live events; Agora for voice calling; third-party SMS APIs for OTP verification.

Web Developer Intern **Apr 2025 – Jul 2025**
Code Eternity, Noida

- Built Cryptalk, a secure messaging application with end-to-end encryption, using React, Node.js, Socket.IO, and MongoDB.
- Built Style Sphere, a full-stack e-commerce platform, using React.js, Express.js, MongoDB, Tailwind CSS, and REST APIs.

PROJECTS (INDEPENDENT, 2026)

MSSST Trust Platform – Next.js, Node.js, Express.js, TypeScript, MongoDB **Jun 2026 – Jul 2026**
mssst.in (live)

- Built a community welfare platform supporting member registration, mutual-aid schemes, and financial transparency.
- Designed a multi-step membership verification workflow (nominee details, payment-proof upload, admin approval) with Cloudinary/AWS S3 document storage.
- Created a reusable generic CommonService (CRUD, dynamic population, aggregation-based pagination), cutting backend controller boilerplate by about 50%; secured APIs with JWT, Bcrypt, Helmet, and rate limiting.

Lofi Radio – Next.js, React 19, TypeScript, Supabase **Aug 2026**
lofiradio.in (live) | github.com/iamarpitsharma/lofi-radio

- Built a real-time web audio player with the YouTube Iframe API for continuous playlist streaming.
- Implemented a server-side playlist parser with a 1-hour in-memory cache, extracting track metadata without YouTube API keys or quota usage.
- Added Supabase Realtime Presence for live listener counts and react-window virtualization for smooth search across large playlists.

EDUCATION

B.Tech in Information Technology, UNSIET (VBSPU), Jaunpur – CGPA: 7.0/10 **2021 – 2025**

CERTIFICATES

MERN Web Development & DSA – CodeHelp (Love Babbar) | Namaste JavaScript – NamasteDev
